I don't quite see what the "technical" discussion is, unless it's them presenting their results that they failed the test for SO2 (and other pollutants?). It's their meeting, so we need their agenda. Personally, I just want to hear what their plan is to come into compliance.

Heather,

I think 1.5 hours is enough time; I would ask Pogo for an agenda of what they would like to cover. I think your "technical" questions about what they're exceeding & why are of benefit to the enforcement group. **I want to make sure that Pogo has time to make their pitch for whatever they are seeking as that is the reason why we are having this meeting, right?** I think the enforcement group needs only to hear what the situation is and follow up discussions can take place via phone if needed. Those are my two cents.
